Intan Dwi Anggreini

Surabaya, Indonesia | Mobile : +62 857-4946-1049 | Email : d.intananggreini99@gmail.com | Portfolio : intananggreini99.web.id
GitHub : github.com/intananggreini99 | LinkedIn : linkedin.com/in/intan-dwi-anggreini-4040402b1

PROFILE

An Applied Data Science student at the Electronic Engineering Polytechnic Institute of Surabaya (PENS) with a computer networking background, building end-to-end data and machine learning systems: ETL pipelines and star-schema data warehouses, Apache Airflow and Spark workflows, and an MLOps credit risk platform with FastAPI, MLflow, DVC and Docker. Interested in data engineering, machine learning and MLOps.

EDUCATION

Electronic Engineering Polytechnic Institute of Surabaya (PENS) 2024 – Current
Bachelor of Applied Data Science (D4 Sains Data Terapan), fifth semester (GPA: 3.58/4.00).

SMK Negeri 1 Kediri (Kediri Vocational High School 1) 2021 – 2024
Vocational High School Diploma in Computer Network and Telecommunication Engineering (average report grade 89/100). Ranked among the top 5 students in the major throughout the three-year program.

PROJECTS

RiskFinder – Machine Learning Credit Risk Analysis Platform Team Lead, Full-Stack and ML Engineer
Link GitHub : github.com/intananggreini99/riskfinder-project
Tech Stack : Python, FastAPI, React, PostgreSQL, MLflow, DVC, Docker

- Led a team building a credit risk platform that predicts borrower default, with a training pipeline (KNN imputation, outlier capping, feature selection, imbalance handling, model comparison, hyperparameter tuning) tracked in MLflow and versioned with DVC.
- Developed a FastAPI and React app with JWT role-based access for model training, registry and activation, risk prediction and monitoring (ROC-AUC, confusion matrix, prediction history), deployed with Docker and PostgreSQL.

Credit Risk Segmentation and Anomaly Detection with UMAP-HDBSCAN on a Data Warehouse Personal Project
Link GitHub : github.com/intananggreini99/UMAP-HDBSCAN_RiskSegmentation_and_CreditAnomalyDetection
Tech Stack : Python, scikit-learn, UMAP, HDBSCAN, PostgreSQL, Pentaho Data Integration, PHP, D3.js

- Built an ETL pipeline (Pentaho Data Integration, SQL) loading 1,000 loan applications from an operational data store into a PostgreSQL star schema with 8 dimension and 2 fact tables.
- Benchmarked UMAP-HDBSCAN against 7 other algorithms on 7 prioritized metrics; it ranked first (Silhouette 0.781, Davies-Bouldin 0.34), isolated 37.9% of applications as anomalies and produced 7 tiered risk segments in an interactive PHP and D3.js dashboard.

Airflow Weather Data Pipeline with Observability and Alerting Team Project
Link GitHub : github.com/mudrik696/airflow-project
Tech Stack : Apache Airflow 3, Python, PostgreSQL, Redis, Celery, Docker Compose, Open-Meteo API

- Co-developed a weather data pipeline for Surabaya with 9 Apache Airflow DAGs covering extraction, transformation, branching data-quality checks and cross-DAG orchestration.
- Added four layers of failure handling: automatic retries, centralized logging to PostgreSQL, SMTP email alerts and a custom UI to investigate and re-run failed tasks, running on Docker Compose (CeleryExecutor, Redis).

Apple Leaf Disease Classification on a Big Data Stack Big Data Project
Link GitHub : github.com/intananggreini99/AppleDiseaseClassification
Tech Stack : PySpark, Spark MLlib, scikit-learn, scikit-image, HDFS, Apache Hive, PostgreSQL, Docker Compose

- Set up a 9-container environment (Spark standalone cluster, HDFS, Hive metastore and HiveServer2, PostgreSQL) and extracted leaf image features in parallel with Spark UDFs into Parquet, Hive and PostgreSQL tables.
- Benchmarked Spark MLlib against scikit-learn on identical features, comparing training time and evaluation metrics, with per-stage durations logged to PostgreSQL.

COVID-19 Distribution Dashboard for Indonesia Web Dashboard
Link GitHub : github.com/intananggreini99/Dasboard_Covid19_PHP-D3JS
Tech Stack : Python, K-Means, PHP, MySQL, D3.js, Leaflet, Grafana

- Built an interactive dashboard of COVID-19 cases across 34 provinces (3,493 records, March to June 2020) with PHP and MySQL JSON endpoints, D3.js charts and a Leaflet choropleth map; grouped provinces into 4 risk levels with K-Means and recreated the view in Grafana.

School Management Information System, TKJ Department of SMKN 1 Kediri Personal Project

Link GitHub : github.com/intananggreini99/MIS_WebDinamis_TKJSMEKSA

Tech Stack : PHP 8, MySQL 8, Bootstrap 5, JavaScript, Docker Compose

- Developed a web MIS with session login and role-based access (admin, teacher, student) to manage users, students, teachers, subjects and the school agenda, including photo uploads; containerized Apache, PHP, MySQL and phpMyAdmin with Docker Compose.

Business Intelligence Dashboards Dashboards

Link Dashboards : Power BI | Looker Studio | Grafana | Tableau Public

Tech Stack : Power BI, Tableau, Grafana, Looker Studio

- Designed sales and regional dashboards: Phi Minimart sales performance (Power BI and Grafana), Toko Kita sales and profit report (Looker Studio), and the distribution of high schools, universities and MSMEs in Kediri City (Tableau Public).

PROFESSIONAL & WORK EXPERIENCE

Staff, Computer Center (Puskom) and Personnel (Kepegawaian) Divisions – Politeknik Negeri Malang, PSDKU Kediri June 2023 – November 2023

- Completed a six-month vocational internship (PKL) supporting the campus's day-to-day administrative operations.

CERTIFICATION

MikroTik Certified Network Associate (MTCNA) – MikroTik 2024

ORGANISATION

Staff, Human Capital Division – IEEE Student Branch PENS 2026 – Current

- Support member development and welfare programs for the student branch, and presented the division's role and programs to members.

Guide (Pemandu) – LKMM PENS 2025, Student Management Skills Training 2025 – Current

- Facilitate management and leadership training sessions for first-year students: deliver material, lead class sessions and collect participant feedback.

SKILLS

Technical Skills

- **Programming :** Python, SQL, R, JavaScript, PHP, Rust, Kotlin
- **AI :** Machine Learning, Deep Learning, Computer Vision
- **MLOps and DevOps :** MLflow, DVC, Docker, Docker Compose, Git
- **Data Engineering :** Apache Airflow, Apache Spark (PySpark), HDFS, Apache Hive, Apache Kafka, Debezium, Pentaho Data Integration, ETL, Data Warehousing (Star Schema)
- **Databases :** PostgreSQL, MySQL, MongoDB
- **Web and APIs :** FastAPI, Flask, REST API, React, PHP, Bootstrap, Leaflet.js
- **Data Visualization :** Power BI, Tableau, Grafana, Looker Studio (Google Data Studio), D3.js, Kibana
- **Systems and Network :** Linux (Debian, Ubuntu, Red Hat), MikroTik, Cisco, wired and wireless network installation

Soft Skills

- Problem Solving, Critical Thinking, Communication, Teamwork, Leadership

Languages : Indonesian, English
